## Awareness & Growth

Play is a safe way to explore and embrace all aspects of our Self, the light and the dark. Instead of judging them, we celebrate them as part of our inherent wholeness. We see that the light is needed just as much as the dark. Like a painting, the contrast between the two is necessary to create the depth and beauty within each of us.

### Spontaneity

In spontaneity there is freedom – freedom not to think, to sound smart, to get it right or to receive approval. It is the freedom to express what wants to be expressed in any given moment. No longer are you responding to life through a pre-set routine. You are participating afresh and alive, dancing in the moment and recreating yourself anew at every turn.
